THE ESCAPE OF LE ROY

Another Attempt to Be Made to Locate the Washington Outlaw.

Sheriff P. Zimmerman, of Everett, came over from Vancouver last evening, whither he had gone to look up the disappointing affair of the escape of a French halfbreed called LeRoy, who six years ago tried to murder a Seattle jewelery man called Phillips, out at Monte Cristo, in Snohomish county. After being traced across the continent and back, but never caught up with, LeRoy was located at Powell lake, which is about opposite Texada island, and a little higher up on the Mainland. Thither Officer Wylie of Vancouver, and Lucas of Van Anda followed him out into the bush, and effecting his capture in dashing style brought him down to the McIntyre logging camp on the old Moodyville mill limit. There they locked him over night in the office, and awakening in the morning found their captive gone.

Sheriff Zimmerman had but little to say in the matter, and very naturally would not commit himself to blaming either of the officers, although he seemed to recognize that the provincial and Vancouver city police should not have been mixed up in the matter. Still on this point he refrained from expressing any opinion. He had a long interview last evening with Supt. Hussey, and is hopeful that another opportunity will occur for the capture of this outlaw, who has now twice escaped the clutches of the law.

Mr. Zimmerman will spend today here seeing the city.

[illegible] dyspeptic, rheumatic, troubled with [illegible] general debility, lacking strength, take Hood's Sarsaparilla.

A large assortment of beautiful reed chairs in Flemish finish, the very latest—at Weiler's.

Victoria, July 28, 1902.

NEWS OF WINNIPEG.

Canadian Northern Service—Fatal Accident—Oldest Orangeman Dead.

Winnipeg, July 28.—(Special)—William McKenzie, president of the Canadian Northern railway, before leaving for Toronto yesterday said he could not give any definite date on which regular passenger service to Port Arthur would be inaugurated, but stated that there was little remaining to be done before the line would be ready.

As the result of injuries received by being knocked down by a car, John McKinnon, an elderly gentleman of Mahinak, Man., died at the Winnipeg General hospital yesterday.

Richard Beamish, a pioneer of Hamiota, is dead. Deceased was 95 years of age, and said to be the oldest Orangeman in Canada.

Fuller's coal sheds at Carievale and a box car were burned today.

FISH ARE SCARCE.

All Quiet on the Fraser—Leroy Threatens Prospectors and Defies Police.

Vancouver, July 28.—(Special.)—There is but little improvement in the salmon run. The Provincial police have returned as their services are not required on the river. A despatch from Fairhaven says the salmon run [illegible] and large numbers of sockeyes are heading for the traps.

The convict, Leroy, has shown himself boldly to two prospectors on Powell lake, and pointing a gun told them to come no further. He then defied the Provincial Police, volunteering his opinion of them with many oaths.

REPORT DENIED.

New York, July 28.—Reports that the Atlantic Coast line has acquired or will acquire control of the L. & N. road have been denied by J. P. Morgan & Co. The two interests are said to be working in harmony.

One hundred and twenty new cases of cholera are reported in Cairo.

SPAIN AND ROME.

Sagasta Impatient for Settlement of the School Question.

Madrid, July 28.—Premier Sagasta states that the negotiations with the Vatican regarding the schools conducted by the religious associations are proceeding very slowly, and if they are not finished by October the government will take other steps. The Premier denied rumors that Spain is allying herself with other powers and declared that any alliance would be burdensome.

EMULATES TRACY.

California Bad Man Wounds Several Would-Be Captors.

Fresno, Cal., July 28.—McKinney, a convict, shot five men and escaped into the country in a stolen rig. McKinney first put out the light of a saloon and then in trying to shoot the cards from the hands of a player, wounded the latter slightly. He then went to a livery stable and at the point of a revolver secured a rig. As he was driving off a constable, a deputy, and several citizens tried to arrest him. He opened fire, wounding four of the party.

Wm. Lynn, whose abdomen and legs were filled with buckshot, succumbed to his wounds.

McKinney also filled the right arm of Jos. Barrows, a printer, with shot and put a bullet into the mouth of Deputy Marshal Willis, another into the foot of Deputy Constable Tompkins, and a load of shot into the arm of W. D. Wert. McKinney is headed for Fresno county, and it is believed he will make for the mountains. He has a shot gun, a rifle and a revolver, and he said before leaving that "they wouldn't be in it" with him.

Canadians Win At Bisley

McKinnon Challenge Cup Captured After Being Shot For Twice.

Magnanimous Conduct of Australian Team Who Got First Award.

Bisley Camp, July 28.—The MacKinnon challenge cup match, which was originally shot off on Wednesday, July 16, and which was ordered to be shot over again today, owing to a protest entered by Lt.-Col. Burland, commandant of the Canadian team, and which was upheld by the winners, the Australians, in refusing to take the prize, was reshot this morning and won by the Canadians. The Dominion's representatives therefore finished up in a blaze of glory, as this match closed the meeting.

The scores of the three leaders were as follows: Canada, 1,375; England, 1,340; Scotland, 1,317. The other teams, including the Australians, who declined the prize after its being awarded them, subsequent to the first decision on Canada's protest, were snowed under.

The team which represented Canada was as follows:

Col. Serg. Maj. M. Macdougall, 5th R. C. A.; Pte. T. T. Peddie, 5th Royal Scots; Lance-Corpl. S. S. Mortimer, 6th D. S. O. R.; Col. Sergt. Maj. F. Richardson, 5th R. C. A.; Capt. Rennie, 2nd Q. O. R.; Col.-Sergt. J. Moscrop, 6th D. S. O. R.; Capt. R. J. Davidson, 8th Royal Rifles; Pte. C. S. Scott, 43rd D. C. O. R.; Sergt. V. A. Smith, 43rd D. C. O. R.; Staff Serg. G. S. Bayles, 10th Royal R. G.; Col. Serg. E. R. Skeddon, 13th Regiment; Staff Sergt. C. C. Carruthers, 4th Hussars.

"A RAG, A BONE, A HANK OF HAIR."

New York, July 28.—Sir Philip Burne Jones' painting, "The Vampire," which inspired Rudyard Kipling's poem bearing the same title, has been purchased by W. K. Vanderbilt. The price said, it is

pick up the cable have been futile owing to unfavorable weather.

THE BIG COAL STRIKE.

Assistance From Bituminous Miners—Another Injunction Issued.

Indianapolis, Ind., July 28.—Secretary Wheland, of the Miners, said today that the anthracite men are being well cared for. Although the assessment from bituminous miners is beginning to come in he does not expect the bulk of the first assessment until the next week, because the majority of the miners are paid semi-weekly. The clerical force at headquarters today handed over the funds. The miners have appealed to the members of the American Federation of Labor.

Parkersburg, W. Va., July 28.—Judge Jackson issued another injunction this afternoon of the same general character of those in whose violation "Mother" Jones and others were tried. It was issued upon the application of Clinton, receiver for the Lemington Coal company, and is directed against 30 strikers and organizers.

Reports of the serious illness of Hon. Joseph Chamberlain are denied.

To Amend B. N. A. Act

Important Conference of Maritime Province Premiers Fixed For September.

Want Constitution Changed to Equalize Representation in Parliament.

Several Steamship Companies Tendering For Fast Atlantic Service.

Montreal, July 28.—Hon. Arthur Peters, premier of Prince Edward Island, was in the city today on his way home from attending the coronation, and made public the interesting information that the Maritime province premiers would hold a meeting in Quebec in September to discuss a very important amendment to the British North America Act.

The Maritime provinces object to losing any of their members in the next redistribution bill. According to the unit fixed by the province of Quebec, each of the Maritime provinces will lose one member. Manitoba and British Columbia had been taken in with the understanding that their representation should not be reduced, and the Maritime provinces premiers want this provision applied to them. Premier Peters states that Hon. Mr. Fielding sympathized with them and will do all he can to help them.

The Star's London cable says: The Allan and the Elder Dempster steamship companies, jointly, and also the Furness line and several others, have tendered for the proposed fast Atlantic service between Canada and Great Britain. The Canadian Pacific railway's offer would entail an outlay of $20,000,000, each passenger steamer costing $4,000,000, and the freight vessels would cost an average of $900,000 each.

Insurance circles regard the proposal to make Quebec a summer port as a mistake, owing to the dangers encountered in navigating the St. Lawrence river. They think that a year-round Halifax service would have every chance of success.

A high C. P. R. official informed me that should the government demand a higher speed than 20 knots an hour, the St. Lawrence route would be abandoned.

Much Sympathy With McAdam

Many Eastern Newspapers Think His Sentence Unnecessarily Severe.

Governor Ross' Condition Is Reported to Be Greatly Improved.

Ottawa, July 28.—(Special)—A score of Eastern Canadian newspapers comment upon the MacAdam's case. While they admit that the Paystreak went too far, the opinion prevails that the case is one for executive clemency.

A telegram from White Horse states that the condition of Governor Ross

er opponent. Arrangements were quickly made by the Afrikanders to entertain the famous leader tonight at a semi-private dinner, tickets to which already stand at five guineas.

A striking contrast to Dewet's return was on Sunday when Generals Botha and Delarey attended church. The building was packed, mainly with women and the service was scarcely concluded when the Cape Town admirers stormed the pew in which the generals sat. With difficulty they retreated to the vestry. The congregation followed, and Generals Botha and Delarey were lifted to the vestry table. The pastor of the church warmly remonstrated, whereupon a number of those present seized the generals and carried them to their carriages, where another demonstration ensued.

COUNTERFEITER ARRESTED.

Chicago, July 28.—Alfred S. Cunningham, said by secret service officers to be the most expert counterfeiter who ever operated in Chicago, is under arrest. Officers who made the capture found a complete counterfeiting plant and several sacks of bogus money concealed in a hollow work bench. The prisoner waived examination today and was held for the federal grand jury.

A. E. FAWSETT,
Secretary and Accountant.
H. H. JONES,
Treasurer and Business Manager.

NEWS OF WINNIPEG.

Two Pioneers Gone—Shooting Affray—C. P. R. Promotion.

Winnipeg, July 29.—(Special)—Harry Hodges, one of Winnipeg's oldest merchants, died this morning, aged 62.

Chas. E. Cavalier, North Dakota's oldest settler, is dead. Mr. Cavalier was 84 years of age, and located at Pembina in 1851, though he came West many years before.

Annie Middleton, inmate of one of the western resorts, shot Hardy Bagil, a restaurant-keeper, through the breast this morning. He will recover. The shooting was the result of a quarrel between the two, who had been on intimate terms.

James Manson, superintendent of the Winnipeg division of the C. P. R., has been promoted to the superintendency of the Ontario division with headquarters at Toronto.

The Brandon summer fair opened today.

Joe Goddard, pugilist, was shot in an election row at Camden, N. J.

Premier Interviewd

Mr Dunsmuir Expresses His Views In the Birmingham Post.

Imperial Interests May Be Strengthened—Attention to Simple Details.

Enthusiastic on Great Resources And Possibilities of British Columbia.

The following interview with Premier Dunsmuir appears in the Birmingham Post, one of the most influential of the English dailies:

A representative of the Birmingham Post saw the Hon. James Dunsmuir, Premier of British Columbia, at the Hotel Metropole. After the object of his visit was stated, the honorable gentleman said:

"The matters to which you refer are being discussed at the conference of Colonial Premiers, and I do not care to say very much about them. My own opinion is that very much could be done towards strengthening the connection between the various parts of the Empire by attention to many details of simple, yet practical nature. Imperial penny postage, for instance, is in line with what I have in my mind, and a number of things in that nature, if carried out, would do more to bind the Empire together than some of the larger projects which are discussed. I find the English people very conservative and inclined to go on in the way they have always gone on. It would be a good idea for them to take more interest in the way other countries, and especially the other parts of the Empire, do things, and by studying their wants and conditions, adapt their methods to them. For instance, I do not see why there should not be a common currency for Great Britain, Canada and Australia. It would be a great convenience and tend to promote trade and communication. For this and other purposes, an Imperial Bond Bank might be organized. This is simply an illustration of ideas that could be developed.

ENCOURAGING CANADIAN INDUSTRY.

"Then again the Imperia
should give every advanta
to Colonial industries. I
ferring now to preferent
much as to ordinary cont
informed that their agent
to Puget Sound in the U
and purchased largely of in
of tinned salmon from t
there, when they could h
hundreds of thousands of

prophesied an immense tr
ers running from Puget
he, along with others, pr
ate. With communicati
as proposed, through the
British Columbia, north
dian Pacific line, it is
that a daily steamer sh
ports across the Pacific.

"Vancouver and Victo
Columbia, are in line w
and the whole Western portion of Canada is deeply and intensely interested in its development. I fully agree with my friend, the Hon. G. W. Ross, Premier of Ontario, that quick, cheap transportation, and a more effective system of trade agencies throughout the Empire are the especial wants of the country at the present time. Australia is equally interested with us in this, and a fast Atlantic service in connection with the Pacific and trans-continental lines means much to those Southern colonies, and I am glad to learn from Australian representatives that there is a strong feeling there in favor of joining with Canada in securing such a service, which would be the greatest possible off-set to the recent Morgan Steamship Consolidation.

A WESTERN OUTLET.

"The building of another railway line through Canada to the Pacific Ocean, north of the Canadian Pacific railway, and more direct, so far as British Columbia and the Northwest are concerned, will—if carried out—give a direct Western outlet to the great grain-fields of Manitoba and the Northwest; and we look to see large elevators being built at Victoria and Vancouver in connection with the forwarding of wheat. So far, the Pacific States have had the monopoly of that trade. It was with pleasure that we learn of the British Columbia firm securing from the Imperial authorities a large contract for supplying grain to the army in South Africa, and that is one of the practical ways I have suggested of accomplishing the real unity of the Empire.

BRITISH COLUMBIA'S PROGRESS.

"I have nothing special to say about politics in British Columbia. There has been a good deal of uncertainty and unrest in political circles, but this is one of the matters which, in a new country, will regulate itself, and the prospects now are that stability is assured. British Columbia being a new country, is passing from one state of things to another, and more permanent one, and owing to the prominence it has attracted as a field of enterprise for investments, many matters have been greatly misrepresented and exaggerated through the press. Mining did better last year than ever before, and under circumstances which at first were not at all promising. The output of the mines for 1901 was $20,086,780, as compared with $16,344,751 in 1900, which in its turn was $4,000,000 in excess of the previous year, so that the progress has been steady and substantial. Up to the present time, for 1902, I am not in a position to give the figures, but have no reason to doubt that the rate of increase will be maintained. The timber industry is in a flourishing condition, especially in regard to home supply; the mills finding an increased and remunerative market in the Northwest Territories and Eastern Canada, which just now are enjoying unusual prosperity. Agriculture in British Columbia, is perhaps the most flourishing of all our industries, owing to the large and exclusive local markets enjoyed, and for a man with some capital to purchase an improved, or partially improved farm in some favored locality, there is no place I could recommend with greater confidence. The salmon canning industry has largely passed into the hands of a large financial combination organized in Eastern Canada, and with the probable adoption of fish-traps, will be placed on a sounder and more prosperous basis in the future.

"I may say that notwithstanding the adverse criticisms which have appeared in London and elsewhere regarding British Columbia, that its credit has been splendidly maintained, and as compared with the price of British Consols, which is the only standard of comparison, our position is several points better than it was two or three years ago, and I am pleased to observe that in the London markets, British Columbian securities show a steady upward tendency, and the demand for investments has been demonstrated to me by the numerous enquiries I have received respecting the proposed new loan.

IRON AND STEEL.

"British Columbia is a country which depends very largely upon more extended means of communication, which is expensive to supply. It has, however, made remarkable progress in that respect, considering expense and difficulty of the new railways, and as soon as the several projects for which authority was obtained during the recent session of the Legislature, are carried out, we shall see still greater and more rapid development. We may look especially for important developments on the Coast in the manufacture of iron and steel, and paper and ship-building. These are the industries, coupled with the commerce of the Pacific, which will give British Columbia an importance greater than that of any of the other provinces of Canada. I may say that the market for iron and steel in the countries bordering on the Pacific Ocean, is very great, and that in 1900 to those countries directly tributable to British Columbia, there were exported to Great Britain alone products of iron and steel such as could be reasonably manufactured on the Pacific Coast to the value of £13,270,000. The same countries imported, of paper and pulp,

river. He is a strong swimmer, but was evidently overtaken with cramp, for after one or two strokes he sank never again to rise.

Hunt and Cranshaw, the fishermen thought to have been drowned in the storm of a week ago, were heard from this afternoon. They were cast on a rocky island in the Gulf. They subsisted on clams for a week, their signals being unseen by passing vessels. They constructed a raft and made for Gambier island, the steamer Strathcona taking them to Nanaimo.

FISH RUNNING FREELY.

The run of salmon is somewhat better, the tide being very low. Boats are late reporting, but the average appears to be about 40 to the boat.

POLICE APPOINTMENT.

Police Officer [illegible] has been appointed [illegible]ce chief for Ste[illegible] Supt. Hussey during the fishing season.

DETECTIVE WYLIE DISMISSED.

Chief Detective Wylie has been dismissed from the service on the recommendation of Mayor Neelands, charged with gross impertinence. Detective Wylie was accused by a couple of Chinamen with accepting bribes as hush money. The Chinamen, when wanted, disappeared. Wylie was daily badgered and annoyed regarding these accusations, which were mysteriously kept from him and the public for weeks, and losing patience gave the police committee a "piece of his mind." Mayor Neelands feared demoralization of the force if Wylie's disrespect to the committee was allowed to go unchallenged. It is stated that Wylie and a companion started for Powell lake today to capture the notorious Le Roy.

TELFORD-M[illegible]

Dr. [illegible] was married today to Ellen Maude Monro, daughter of the superintendent of the Chemainus mills. They will spend their honeymoon in New York. Dr. Telford will return in time to take charge of Dr. Jones' private hospital here, which is just being completed.

Victoria's Senator

Mr. Templeman to Succeed Hon. R. W. Scott as Secretary of State.

Mr. Scott Will Replace Sir Oliver Mowat at Toronto.

Sir William Mulock to Be Appointed High Commissioner.

Ottawa, July 29.—(Special.)—It is now well understood that Hon. R. W. Scott will succeed Sir Oliver Mowat as Lieutenant-Governor of Ontario. Sir Oliver wants a second term, but the stalwarts of the party think that the Lieutenant-Governor, after 28 years continuously in office, ought to be satisfied. Mr. Scott will be succeeded as Secretary of State by Senator Templeman, of Victoria, who accepted a seat in the cabinet without portfolio some months ago, on the understanding that he would be provided for before many months elapsed.

Another interesting report is current here, namely, that Lord Strathcona will retire from the High Commissionership before the year is out, and will be succeeded by Sir William Mulock.

INTERCOLONIAL SURPLUS.

The government organs are authorized to announce that there will be a surplus of a few thousand dollars over the working expenses on the Intercolonial railway for the year just closed. This is accomplished by a charge to capital of items which are properly chargeable to current accounts.

TROUBLE ON TELEGRAPH LINE.

Inquiry at the Department of Public Works today elicited the information that the rumor that trouble is expected with employees of the government telegraph line to Dawson, is correct. Friction between the men and Superintendent Crean originated last week, when he made an announcement that the number of employees was being reduced, likewise the wages paid to those kept on. The men do not take kindly to the proposal, and made threats to destroy the line. Crean communicated with the

of men also. This year the Territories will require more men than they did last year, and the indications are that it will require considerably over 20,000 to supply Manitoba and the Territories.

As the postal cards arrive giving the estimates of the number of men required in each township, this number is entered upon a map at the Department of Agriculture, and a glance at this map gives a good idea of what parts of the province will produce most wheat, and which districts are most prosperous and thickly settled. Two townships, for instance, near Plum Coulee and Rosenfeld, call for 200 and 175 respectively, two near Morden, 100 and 175, one near Miami 100, one near Portage la Prairie 100, one near Neepawa 200, one near Hartney 200, one north of Deloraine 200, one near Lauder 100, one near Wawanesa 100, while in the vicinity of Virden, Brandon and other large places the numbers are estimated as approaching close to these. Wherever the township is calling for a large number, it is usually found that the surrounding district also requires many men. These spots are the most fertile, and longest under cultivation in the province.

THAT ANDRE STORY.

Rev. Mr. Farris, the Anglican missionary, who is here from York Factory, Hudson Bay, says it is extremely improbable that the instruments reported found near the mouth of Fish river by Surveyor Tyrell, are those of Andre, the missing balloonist. Fish river is not far from Fort Churchill, Hudson Bay, and the Esquimaux in that part of the country are particularly friendly and kind, and are in constant touch with the Hudson's Bay company's employees at Fort Churchill. D. Hanbury, English explorer, lost his geological and meteorological instruments in that vicinity several years ago, and the instruments found are probably his, not Andre's.

—o—

The agrarian riots in Galicia are becoming more serious. Several rioters have been wounded in fights with the police.

POLICE APPOINTMENT.

Police Officer [illegible] has been appointed [illegible] chief for [illegible] Supt. Hussey during the fishing season.

DETECTIVE WYLIE DISMISSED.

Chief Detective Wylie has been dismissed from the service on the recommendation of Mayor Neelands, charged with gross impertinence. Detective Wylie was accused by a couple of Chinamen with accepting bribes as hush money. The Chinamen, when wanted, disappeared. Wylie was daily badgered and annoyed regarding these accusations, which were mysteriously kept from him and the public for weeks, and losing patience gave the police committee a "piece of his mind." Mayor Neelands feared demoralization of the force if Wylie's disrespect to the committee was allowed to go unchallenged.
