The total number of teachers employed was 1,179, an increase of 142. Of this number 16 were employed in the colleges, 71 in the high schools, 499 in the city graded schools, 263 in the rural municipality schools, and 330 in the rural and assisted schools. The percentage of regular attendance throughout the Province was 71.27.

Fortieth Annual Report - Public Schools of BC 1911

Teachers are aiming at a higher standard in the subject of reading, and nearly all attempt to get distinct enunciation, fair expression, and a thorough understanding of the passages read. The teaching of arithmetic is also undergoing an improvement. More attention is being given the four fundamental rules with the view of securing greater accuracy and rapidity. New processes and new principles are taught through oral class-instruction, which in nearly all schools precedes the written work. The subject, however, is still receiving a share of time out of all proportion to its importance. In many class-rooms fully one-fourth of the time is devoted to its study. In teaching geography, wall-maps are not relied on as much as they formerly were. Sketch-maps, which are much more effective in maintaining interest, are filled in by the teacher as the lesson advances. The importance of getting the children themselves to draw memory maps has not yet been fully appreciated by all the teachers. Too much of the time that is set apart for the study of history is being spent in learning isolated facts and unimportant events. Very little discrimination is shown in some schools. The great movements and achievements in the history of the nation are not emphasized sufficiently, and the great men that were associated with the development of the Empire are lost in a crowd of persons that rendered little service.

I have, etc.,
J. D. GILLIS,
Inspector of Schools.

INSPECTORATE NO. 3.

VANCOUVER, B.C., November, 1911.

Alexander Robinson, Esq.,
Superintendent of Education, Victoria, B.C.

SIR,—I beg to submit herewith my annual report on the schools of Inspectorate No. 3 for the year ending June 30th, 1911:—

Inspectorate No. 3 included the schools on the Mainland of British Columbia from Vancouver City to Stewart, together with those on the islands north of Vancouver, including the Queen Charlotte Group; those in the Comox Valley, on Vancouver Island; and those on the north side of the Fraser River between Vancouver and Nicomen.

The number of teachers employed in this inspectorate during the year was eighty-four. In several parts of the inspectorate there was a marked increase in the school population, necessitating additional teachers in established schools and the opening of a number of new schools. Prince Rupert, the banner city of the north, added two teachers to the staff, while Port Moody, Mission City, and Hatzic added one each. At each of these places there is now a fine, new, up-to-date school-house suitable to the requirements of the district. Schools were put into operation for the first time at Stewart, Sandspit (Moresby Island), Sloan, Ocean Falls, Nikrap, Powell River, Roberts Creek, Lake Buntzen, and Stavé Falls.

The only schools closed through lack of pupils were Metlakatla, Campbell River, and Lower Squamish.

Next year it will be necessary to open schools at Nob Hill, near Comox; No. 7 Mine, near Cumberland; Headquarters (the base of operations of the Canadian Western Lumber Company, Vancouver Island), Gillis Bay (Texada Island), and Lower Squamish, now called Newport. An additional room is now under construction at Courtenay, and another at Hammond, where the attendance in one room reached sixty.

In very few districts in this inspectorate has any effort been put forth to improve the school buildings or make the surroundings more attractive. Few parents seem to realize how much of their young lives their children spend at school, how impressionable these young minds are, and how necessary it is that the surroundings should be such as will add to their comfort, cheerfulness, and happiness. In many assisted school districts the buildings provided are so ill-suited to the purpose that it seems a pity to permit such badly lighted, ill-ventilated, and poorly furnished quarters. Great credit is due Maple Ridge, Howe Sound, and Lower Bella Coola for their school gardens and beautiful rows of shade-trees that add so much to the general appearance of the school and its surroundings.
